

# Ohme

## Home Pro

### Introducing the Ohme Home Pro, your EV's new best friend.

Our latest home EV charger, featuring an interactive LCD screen, displays live charge data and gives you the option to control your charging from the charger itself.

- Integrates with your energy tariff to charge at the cheapest and greenest times
- Control your charging via the interactive LCD screen or our trusted app
- Quick, compact and discreet installation
- Keep control of your costs with our max price cap setting
- Track your CO2 consumption with our 'Green Score' feature
- Feel confident that your car will be ready to go when you are

*"100% I'd recommend Ohme all the way, above every other product. There is level of flexibility with Ohme that you don't get with other providers."*

- Kaushik B

### Jersey Electricity and Ohme make it easy to charge for less.

Save money on your EV charging by selecting your JE tariff within the Ohme app and setting up a charge schedule.

Your Ohme charger will automatically prioritise lower cost periods which are as much as **47% lower\*** than the standard daytime tariff!

\*Economy 7 Night Rate of 8.63p (incl GST) vs General Domestic rate of 16.31p (incl GST).
